FLEXIBLE MOULDING

FCBP has over 750 moulding profiles in our catalogue for use in just about any design situation. In addition to the rigid polyurethane, we also produce most of our profiles in either **Iron** or **Deco Flex**. These products can be used around a variety of radii and will match up to rigid material. For specific application and pricing on flexible material please contact your Customer Service representative. Refer to page 235 for flexible moulding installation instructions.

Iron Flex is an elastomeric semi-flexible material, which can be used in either interior or exterior applications. This material is limited to moulding profiles that are moulded in a lay down, flat back configuration.

Deco Flex is cellular polyurethane, which can only be used for interior applications. It can be used with most of our moulding profiles.

TECHNICAL DATA SHEET ————— IRON FLEX

DESCRIPTION

Iron Flex is a composite polyurethane elastomer system, formulated for the manufacture of flexible moulding and trim.

UNIQUE PROPERTIES

Iron Flex has become an industry standard with over 15 years of consistent performance in the production of flexible moulding. Iron Flex is specifically designed to produce an extremely flexible moulding that is nailable, stainable and paintable, to be used in place of wood millwork. Iron Flex outperforms natural wood in that it will not crack, rot, warp or allow insect infestation.

LARGE MOULDING

FCBP makes products light, large, and durable!

Using FCBP' one-piece cornices eliminates the need for multiple scaffolding setups and permits for simpler blocking, which shortens installation time, allowing for greater contractor profitability! Contact your customer service representative for FCBP' one-piece cornice.
